

Education		
2013–2015	Ph. D. degree (unfinished) , CMC MSU ¹ , Moscow, Russia	
	affiliation	Laboratory of Mathematical Methods of Image Processing
	supervisor	Prof. Andrey S. Krylov
2008–2013	Specialist (M. S.) degree , CMC MSU ¹ , Moscow, Russia	
	field of study	applied mathematics and computer science
	specialization	mathematical physics
	affiliation	Laboratory of Mathematical Methods of Image Processing
	supervisor	Prof. Andrey S. Krylov
	GPA	5.0 of 5
	thesis	Development of combined image enhancement methods
1998–2008	Secondary general education , Gymnasium №26, Naberezhnye Chelny, Russia	
	focus	mathematics and physics
	GPA	5.0 of 5

Skills	
programming languages	Golang, Python, TypeScript, Java, C/C++, Bash, SQL, Matlab, Factor
cloud infrastructure	AWS, Kubernetes, Docker, Helm, ArgoCD, HashiCorp Vault
data processing	Apache Kafka, Apache Spark, Apache Hadoop/Hive, Grafana, Prometheus
databases	Amazon DocumentDB, Amazon Keyspaces, PostgreSQL, Redis, RediSearch, Clickhouse, MongoDB, YDB, Apache Cassandra, Apache HBase
libraries	React, Effector, NumPy, SciPy, CUDA, OpenGL
tools	Visual Studio Code, Git, GitHub Actions, GitHub Copilot, Vim, IntelliJ IDEA
operating systems	macOS (over 8 years), Fedora (over 1 years), Debian (over 15 years)

Spoken Languages	
English	Proficient (C2)
Russian	Native

Work Experience	
since 07/2021	Zerion Responsible for the infrastructure of DeFi portfolio tracking platform zerion.io . <ul style="list-style-type: none">Designing and maintaining real-time blockchain data processing pipelines for various ecosystems (Ethereum, Solana)Developing internal (gRPC) and public (REST) high-load API servicesImplementing integrations with major DeFi protocolsLeading development of Zerion DNA and Zerion Rewards projectsCreated a shared Golang library and established best practices and development guidelines for the team <div><div>location</div><div>remotely</div><div>position</div><div>tech lead</div></div>
10/2018–06/2021	Joom Responsible for the recommendation engine for e-commerce platform joom.com . <ul style="list-style-type: none">Designed and implemented data processing pipelines for marketplace analytics and user behavior analysisImproved recommendation feed quality through machine learning algorithms and A/B testing frameworksMaintained high-load web services for real-time recommendations serving millions of usersLed infrastructure migration from AWS EC2 to Docker and Kubernetes for improved scalabilityContributed to Joom Ads auction mechanics development for the merchant advertising platform <div><div>location</div><div>Moscow, Russia</div><div>position</div><div>senior machine learning engineer</div></div>
05/2015–09/2018	Yandex Responsible for the recommendation engine for e-commerce platform market.yandex.ru . <ul style="list-style-type: none">Built comprehensive offline data processing systems for marketplace transaction and user behavior dataDesigned historical user data collection system for personalized recommendations and analyticsDeveloped and maintained A/B testing framework for recommendation algorithm evaluationLed migration from Hive to YDB for improved data processing performance and reliability <div><div>location</div><div>Moscow, Russia</div><div>position</div><div>machine learning engineer</div></div>
10/2014–12/2014	Samsung Responsible for image super-resolution project implementation. <ul style="list-style-type: none">Worked on various motion estimation algorithms for video enhancement <div><div>location</div><div>Moscow, Russia</div><div>position</div><div>software engineer</div></div>
07/2014–08/2014	Space Research Institute Responsible for satellite auroral imaging research. <ul style="list-style-type: none">Developed efficient numerical methods for large-scale ground and atmospheric scattering compensationPrototyped algorithms in Matlab and implemented production versions in Python <div><div>location</div><div>Moscow, Russia</div><div>position</div><div>research intern</div></div>
07/2011–09/2011	ADSC²
01/2012–02/2012	Responsible for computer vision and GPU computing research projects.
07/2012–10/2012	<ul style="list-style-type: none">Implemented real-time stereo matching algorithms optimized for GPU architectureDeveloped Kinect depth map enhancement algorithms using GPU parallel processingResearched edge-aware recursive image filtering techniques for real-time applications <div><div>location</div><div>Singapore</div><div>position</div><div>junior research assistant</div><div>supervisors</div><div>Dr. Dongbo Min, Dr. Kyle Rupnow</div></div>
